GUIDELINES FOR AUTHOR

GENERAL REQUIREMENTS

Indonesian Journal of Agricultural Science (IJAS) publishes primary research articles of current research topics, not simultaneously submitted to nor previously published in other scientific or technical journals. General review articles and short communications will not be accepted. The journal maintains strict standards of content, presentation, and reviewing. The official language of the journal is English. The manuscript should be prepared in good English (American or British usage is accepted, but not a mixture of them). Author(s) of non-native English speakers are encouraged to get help from colleagues who have good English. The journal does not provide any English assistant services in correcting the manuscript. All manuscripts are firstly screened on their topic suitability and language quality. The journal is free open access and free of charge. For more information, please contact the editorial office.

ETHICS IN PUBLISHING

Please see our information pages on Publication Ethics and Malpractice Statement

SCOPE

The journal will consider papers from any source if they make an original contribution to the experimental or theoretical understanding and application of theories and methodologies of some aspects of agricultural science. The definition of agricultural science is kept as broad as possible to allow the widest coverage in the journal including socio-economic aspects. The focus of the journal is in the following areas: Agronomy, animal science, soil science, climate and environment related to agricultural aspects. Agronomy covers the topics of plant breeding, physiology, production, biotechnology, plant protection (pests and diseases) and postharvest. Animal sciences include breeding, nutrition, reproduction, and disease. Soil Sciences cover aspects of mineralogy, classification, land evaluation, chemistry, fertility, fertilizer, conservation, and biology. The journal is published twice a year in June and December.

MANUSCRIPT SUBMISSION

The manuscript should be submitted to IJAS Editorial Office using Online Submission at E-Journal portal address: http://ejournal.litbang.pertanian.go.id/index.php/ijas/about/submissions#onlineSubmissions, where author register as Author by online. If authors have any problems on the online submission, please contact IJAS Editorial Office, Indonesian Institute for Agricultural Technology Transfer, Jalan Salak No. 22 Bogor 16151, Indonesia, email: jurnalijas@gmail.com; bpatp@litbang.pertanian.go.id. The submitted manuscript should be accompanied by a signed Copyright Transfer Agreement (CTA) form (.pdf file).

REVIEWING OF MANUSCRIPT

All papers submitted to IJAS are peer-reviewed. The decision for publication, amendment, or rejection is based on reviewer recommendations. If reviewers consider a manuscript unsuitable for publication in this journal, a statement explaining the basis for the decision will be sent to the authors shortly. Decision of the IJAS Editor is final.

REVISION OF MANUSCRIPTS

Revised manuscripts should be returned to the editor by Online Submission Interface (http://ejournal.litbang.pertanian.go.id/index.php/ijas). The revised manuscripts returned later than four weeks will be considered and treated as a new submission.

MANUSCRIPT PREPARATION

The manuscripts must be prepared using MS word with double spacing throughout, 3-cm margins on the top, bottom and left-hand side of the paper, and maximum 20 pages. Author(s) should provide the page number and numbered line for each page.

MANUSCRIPT STRUCTURE

Manuscript covers Title, Abstract, Introduction, Materials and Methods or Approach/Methodology, Results and Discussion, Conclusion, Acknowledgment, and References. Appendices may be included if necessary. Each section is given the capital letter. Further subsections are given subheading in the lowercase with capital for each word.

The title should be concise, factual, informative, and should contain not more than 15 words in English and Indonesia. For non-Indonesian authors, the title in the Indonesian language will be handled by editors. The name(s) of the author(s) should appear below the title, followed by the full address at the time the work was carried out, and their present addresses, if they are different. Indicate author’s affiliation address with a superscript number and give asterisk (*) for the corresponding author who will handle the manuscript during review and revision processes. Provide email address for the corresponding author.
The abstract summarizes the study in one paragraph of not more than 250 words in English and Indonesia (Indonesian abstract is not applied for non-Indonesian authors). The abstract should describe briefly and concisely the problem, the objective, the methods, significant data, principal findings, and conclusions. Only standard terms, scientific nomenclature and accepted abbreviations should be used.

Keywords appear immediately after the abstract of maximum 5 words. These keywords allow the readers to easily access the publication.

The introduction should put the work into regional or international perspective, briefly review the literature, and clearly state the objectives and the importance of the research.

Materials and methods or approach/methodology should provide a brief description for already published methods supporting by references. New methods should be described in detail to allow other workers to repeat or apply the procedures.

Results and discussion could be presented either in one section (preferably) or separated section. Figures and tables should be used in the results section wherever possible. The discussion should explain the significance of the results of the research, but not repeat them. Discussion should be related to the objective, method and main findings.

Conclusions should be drawn with regard to the title, objectives, discussion of the findings and supported by the data. Suggestion could be given if necessary.

Acknowledgments should be provided regarding the financial support, material and instrument accessibility, technical assistance, English corrections, writing assistance, and personal communications.

References should be made to previous works in the text with the University Worcester-Harvard Style. Reference should use reference management tool, Mendeley. Citation models are as follow: single reference (Anda 2012), more than one references should be written in the order of date; for example, (Partohardjono and Adiningsih 1991; Widjaja-Adhi 1995; Muljadi 1997). If there are more than two authors then the surname should be followed by et al. Remember that et al. is NEVER used in the list of references, although it is acceptable as a reference in the text. Please provide all authors and all editors for citation in the references section. Unpublished references should be avoided. References should be listed in the alphabetical order. Each list reference should be cited in the text, and each citation should be listed in the references section. The following are examples of basic references format:

**Journal articles**

**Book/complete book**

**Articles in book/chapter**

**Dissertation/theses**

**Conference proceedings**

**Conference paper**

Research papers/reports/working papers
Only papers appearing as part of an institutions working papers series should be classified as working process. These should always include a specific working paper number as assigned by the institution.
Example:

Article online

Units of measurements of the SI System should be used for all measurements.

Tables should be typed with double spacing, numbered consecutively, have brief titles, and be referred to in the text. Vertical rules are not accepted. Denote footnotes using superscript numbers.

Illustration: All figures should be able to fit within journal size and proportion after reduction, without loss of details. Each figure should have the number, and caption, followed by a brief description of the way the particular experiment was carried out if this is not explained in the text. Image/photograph should be submitted online with a minimum of 531 × 1328 pixels (h × w) or proportionally more. The image should be readable at a size of 5 × 13 cm using a regular screen resolution of 300 dpi. Symbols and abbreviations used in the figure should also be explained in footnotes immediately underneath the figure. Each figure must be labeled for X and Y axes, All figures must be referred to in the text. The Editorial Office will provide detailed assistance if necessary. Spell out all abbreviations.
PUBLICATION ETHICS AND MALPRACTICE STATEMENT

Indonesian Journal of Agricultural Science (IJAS) is a peer-reviewed electronic international journal. This statement clarifies ethical behavior of all parties involved in the act of publishing an article in this journal, including the author, the chief editor, the Editorial Board, the peer-reviewer and the publisher (Indonesian Agency for Agricultural Research and Development). This statement is based on COPE’s Best Practice Guidelines for Journal Editors.

ETHICAL GUIDELINE FOR JOURNAL PUBLICATION

The publication of an article in a peer-reviewed IJAS journal is an essential building block in the development of a coherent and respected network of knowledge. It is a direct reflection of the quality of the work of the authors and the institutions that support them. Peer-reviewed articles support and embody the scientific method. It is therefore important to agree upon standards of expected ethical behavior for all parties involved in the act of publishing: the author, the journal editor, the peer reviewer, the publisher and the society.

Indonesian Agency for Agricultural Research and Development as publisher of IJAS takes its duties of guardianship over all stages of publishing extremely seriously and we recognize our ethical and other responsibilities. We are committed to ensuring that advertising, reprint or other commercial revenue has no impact or influence on editorial decisions. In addition, the Indonesian Center of Agricultural Library and Technology Dissemination of Indonesian Agency for Agricultural Research and Development and Editorial Board will assist in communications with other journals and/or publishers where this is useful and necessary.

PUBLICATION DECISIONS

The editor of the IJAS journal is responsible for deciding which of the articles submitted to the journal should be published. The validation of the work in question and its importance to researchers and readers must always drive such decisions. The editors may be guided by the policies of the journal’s editorial board and constrained by such legal requirements as shall then be in force regarding libel, copyright infringement and plagiarism. The editors may confer with other editors or reviewers in making this decision.

FAIR PLAY

An editor at any time evaluate manuscripts for their intellectual content without regard to race, gender, sexual orientation, religious belief, ethnic origin, citizenship, or political philosophy of the authors.

CONFIDENTIALITY

The editor and any editorial staff must not disclose any information about a submitted manuscript to anyone other than the corresponding author, reviewers, potential reviewers, other editorial advisers, and the publisher, as appropriate.

DISCLOSURE AND CONFLICTS OF INTEREST

Unpublished materials disclosed in a submitted manuscript must not be used in an editor’s own research without the express written consent of the author.

DUTIES OF REVIEWER

Contribution to Editorial Decisions

Peer review assists the editor in making editorial decisions and through the editorial communications with the author may also assist the author in improving the paper.

Promptness

Any selected referee who feels unqualified to review the research reported in a manuscript or knows that its prompt review will be impossible should notify the editor and excuse himself from the review process.

Confidentiality

Any manuscripts received for review must be treated as confidential documents. They must not be shown to or discussed with others except as authorized by the editor.

Standards of Objectivity

Reviews should be conducted objectively. Personal criticism of the author is inappropriate. Referees should express their views clearly with supporting arguments.

Acknowledgement of Sources

Reviewers should identify relevant published work that has not been cited by the authors. Any statement that an observation, derivation, or argument had been previously reported should be accompanied by the relevant citation. A reviewer should also call to the editor’s attention any substantial similarity or overlap between the manuscript under consideration and any other published paper of which they have personal knowledge.
Disclosure and Conflict of Interest

Privileged information or ideas obtained through peer review must be kept confidential and not used for personal advantage. Reviewers should not consider manuscripts in which they have conflicts of interest resulting from competitive, collaborative, or other relationships or connections with any of the authors, companies, or institutions connected to the papers.

DUTIES OF AUTHORS

Reporting standards

Authors of reports of original research should present an accurate account of the work performed as well as an objective discussion of its significance. Underlying data should be represented accurately in the paper. A paper should contain sufficient detail and references to permit others to replicate the work. Fraudulent or knowingly inaccurate statements constitute unethical behaviour and are unacceptable.

Data Access and Retention

Authors are asked to provide the raw data in connection with a paper for editorial review, and should be prepared to provide public access to such data (consistent with the ALPSP-STM Statement on Data and Databases), if practicable, and should in any event be prepared to retain such data for a reasonable time after publication.

Originality and Plagiarism

The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others that this has been appropriately cited or quoted.

Multiple, Redundant or Concurrent Publication

An author should not in general publish manuscripts describing essentially the same research in more than one journal or primary publication. Submitting the same manuscript to more than one journal concurrently constitutes unethical publishing behaviour and is unacceptable.

Acknowledgement of Sources

Proper acknowledgment of the work of others must always be given. Authors should cite publications that have been influential in determining the nature of the reported work.

Authorship of the Paper

Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported study. All those who have made significant contributions should be listed as co-authors. Where there are others who have participated in certain substantive aspects of the research project, they should be acknowledged or listed as contributors. The corresponding author should ensure that all appropriate co-authors and no inappropriate co-authors are included on the paper, and that all co-authors have seen and approved the final version of the paper and have agreed to its submission for publication.

Hazards and Human or Animal Subjects

If the work involves chemicals, procedures or equipment that have any unusual hazards inherent in their use, the author must clearly identify these in the manuscript.

Disclosure and Conflicts of Interest

All authors should disclose in their manuscript any financial or other substantive conflict of interest that might be construed to influence the results or interpretation of their manuscript. All sources of financial support for the project should be disclosed.

Fundamental errors in published works

When an author discovers a significant error or inaccuracy in his/her own published work, it is the author’s obligation to promptly notify the journal editor or publisher and cooperate with the editor to retract or correct the paper.
